

Network Engineer

Position Description

The Network Engineer will provide day-to-day hands on support to the organization's data center and end user systems including laptops, servers, mobile devices, and applications. This position interfaces mainly with internal employees and departments with some interaction with external clients. Common tasks include troubleshooting user desktop issues, building and configuring new PC's, performing various updates, and providing remote support for branch offices. Other areas of responsibility are LAN support, break/fix, software upgrades, patch management, Anti-Virus management, image management, application installs, user support and training, etc.

Title Network Engineer **Location** Northbrook, IL
