### LOCATION

India, Work From Home

### OUR COMPANY

L2 Software Development India Pvt. Ltd., owned by Liventus, is a full-service business technology solutions company. We offer dedicated teams of full-time developers, designers, marketing professionals, network managers, and business consultants. We have created and managed, from the ground-up, dozens of eCommerce sites that generate tens of millions of dollars annually. We have created and implemented CRM Systems, paperless office systems, purchase order systems, 3D imaging tools, and customer service applications. We have done work and continue to manage applications for companies like Tag Heuer, daVinci Prepaid, Glentronics, Relay Health, NOW Foods, Good Feet Worldwide, Broadway Direct, and more.

### POSITION DESCRIPTION

Liventus India is seeking several Quality Assurance Engineers who will be responsible for performing tests on existing as well as new computer applications to isolate and solve issues related to legacy as well as new programming platforms. The Functional Tester will initiate testing, analyze data, review results and identify technical problems as well as find solutions to these issues.

### RESPONSIBILITIES

- Write test plans, scenarios, scripts or procedures
- Review and approve testing programs that addresses areas such as database impacts, software scenarios, or usability
- Review documentation of software defects and assign software developers to investigate and resolve the issue
- Write test schedules or strategies in accordance with project scope or delivery dates
- Review software documentation to ensure technical accuracy, compliance or completeness or to mitigate risks
- Participate in product design reviews to provide input on functional requirements, product designs, schedules, or potential problems
- Exercises independent judgment with minimal direction from supervisor

### REQUIREMENTS

- BS degree with computer science, quality assurance, or engineering emphasis or equivalent preferred
- Expertise in testing and quality assurance processes, tools, and methodologies, including experience leading successful process improvement efforts
- Experience in test planning, including developing test approaches, cases, conditions, and expected results, and in test execution and results
