

## Senior Web Developer (C# / .NET /Angular)

### HOW TO APPLY

Visit [jobs.Liventus.com](https://jobs.Liventus.com), fill out the form, and attach your resume.

### LOCATION

North America, Work From Home

### OUR COMPANY

Liventus is a full-service business technology solutions company. We offer dedicated teams of full-time developers, designers, marketing professionals, network managers, and business consultants. We have created and managed, from the ground-up, dozens of eCommerce sites that generate tens of millions of dollars annually. We have created and implemented CRM Systems, paperless office systems, purchase order systems, 3D imaging tools, and customer service applications. We have done work and continue to manage applications for companies like Tag Heuer, daVinci Prepaid, Glentronics, Relay Health, NOW Foods, Good Feet Worldwide, Broadway Direct, and more.

### POSITION DESCRIPTION

We are looking for an extremely detailed and hard-working individual with 5+ years' experience building web applications and related components. This individual must possess strong working experience and knowledge of web application development within the full Microsoft technology stack including C#, .Net Core, Entity Framework Core, TypeScript, SQL Server, and Azure. Experience with modern front-end frameworks, such as Angular or React, is required. The candidate must be able to work in both a team and individual setting and must have strong architecture and conceptual skills. Demonstrated experience with leading a project and team is a plus. Prior work with WPF would also be a plus.

### RESPONSIBILITIES

- Architect and develop custom enterprise applications using the Microsoft technology stack and the Angular (or React) framework. Lead architecture discussions and documentation around application design and development. Manage development teams and support of applications. Deploy systems to various production and pre-production environments and troubleshoot issues. Create technical documentation such as design documents, specifications, software architecture documents, and instructions. Regularly communicate with product owners and interpret requirements. Work in a team environment using agile development processes and deliver work on time and within budget. Follow up with issues in an efficient manner, including working hand-in-hand with Quality Assurance, Project Management, and/or senior developers. Regularly communicate project progress, issues, and risks to team and managers. Handle code reviews and quality checks. Continue to learn and adapt to new languages and technologies.

### REQUIREMENTS

- Bachelor's degree or higher in a related field. Minimum of 5 years' working experience and strong understanding and exposure to Microsoft .NET. Minimum of 5 years' working experience and strong understanding and exposure to MS SQL Server and SQL coding. Experience in WPF would be a plus. Strong working experience in responsive website design. Working experience in agile development and Microsoft DevOps (or other tools such as JIRA). Microsoft Certifications in related areas is a plus. Master's degree in technology-related areas is a

plus.

## POSITION BENEFITS

- Competitive base salary Additional compensation through flextime and bonus Business expense reimbursement 401K and Profit Sharing Medical, dental, and vision insurance Group life insurance Ongoing education Fitness program Emerging tech Northbrook office, West Loop office, or Work from home
