

# SQL Database Administrator

## Position Description

The SQL Server Database Administrator (DBA) will work closely with our organization's application developers, network team, and business users to design, monitor, troubleshoot, and support database management systems. The DBA role will be responsible for establishing database business rules, maintaining documentation of data and access protocols, and assisting in the development and implementation of best practices for the management of databases including the assurance of database policies and procedures, data integrity, data extraction, reporting, and analysis.

**Title** SQL Server Database Administrator **Location** Bangalore, India

## Company

Liventus offers a complete array of consulting and development services nationwide, including custom software development, eCommerce, mobile technology solutions, and more to fit businesses' and corporations' needs while exceeding expectations.

Liventus accepts resumes on a daily basis for full-time or internship positions within the company.

## Job Responsibilities

- Control application patch management and version control
- Plan and control database instance strategy
- Install, configure, and upgrade server software and related products
- Perform application tuning and performance monitoring
- Develop, maintain, and execute sound backup and recovery policies and procedures
- Develop and maintain security and access standards and guidelines
- Create and maintain documentation on best practices
- Conduct code reviews and help to enforce standards and practices
- Train developers and users on best practices, standards, and guidelines
- Help to triage technical issues (i.e., configuration, code, patch, data)
- Provide consultation to development and network teams
- Understand and support middleware and integration solutions
- Implement and maintain database security (create and maintain users and roles, assign privileges) and encryption
- Identify and evaluate industry trends in database management systems to serve as a source of information and advice for upper management
