

Director of Software Engineering

Position Description

We are actively seeking a highly experienced software engineer to lead our development team. As Director of Software Engineering, you will be responsible for leading a growing team of developers and guiding the software development strategy. An ideal candidate will possess a high level of technical knowledge, in addition to superior communication and leadership skills.

Title Director of Software Engineering **Location** Bangalore, India

Company

Liventus is currently seeking to hire a qualified and experienced Director of Software Engineering for our Bangalore office. Liventus offers a complete array of consulting and development services to businesses and corporations worldwide, including custom software development, ecommerce, mobile technology solutions, and more. Liventus accepts resumes on a daily basis for full-time and internship positions.

Job Responsibilities

- Effectively lead a team of network engineers, located in our Northbrook, IL and Bangalore, India offices, to design and develop relevant software applications and systems.
- Foster a strong “mentoring” culture in which one-on-one and group meetings regularly take place to identify problems and provide the necessary assistance, counsel, feedback, and encouragement.
- Develop, implement, maintain, and enforce our application development standard operating procedures (SOP).
- Effectively manage software engineering projects/tasks and prioritize them to make sure that key projects are managed in a timely and effective manner.
- Ensure a proper development infrastructure is in place to effectively design, develop, maintain, and test software/systems.
- Develop, implement, and maintain a protocol for fielding and resolving end-user software-related technical issues using an existing web help desk (WHD) system.
- Create a collaborative software development environment that effectively works with other departments (i.e. network administration, data, departmental managers, project managers etc.) to ensure a coordinated software engineering effort.
- Participate in the recruitment and ongoing hiring, training, and evaluation of the software engineering team.
- Ensure that our organization is kept updated on all third-party product development, and that we receive the proper third-party software support and troubleshooting care by effectively managing relationships with third-party software vendors and suppliers
- Maintain a software engineering roadmap. On a regular basis, evaluate our current software engineering environment to ensure the technology is appropriate and current.
